

miniatures.com™

GRAND PRIZE: \$1000 miniatures.com GIFT CERTIFICATE!

FIRST PLACE: \$500 miniatures.com GIFT CERTIFICATE

SECOND PLACE: \$350 miniatures.com GIFT CERTIFICATE

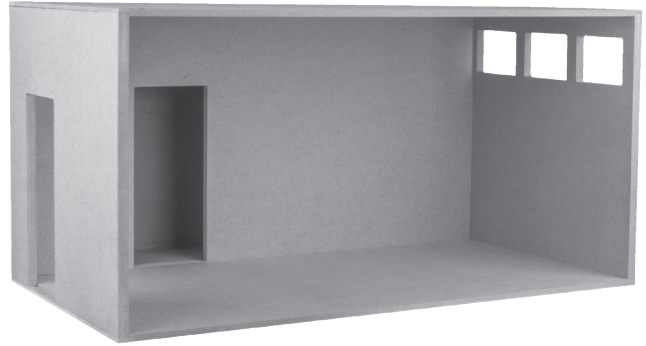

THIRD PLACE: \$250 miniatures.com GIFT CERTIFICATE plus at least one \$200 miniatures.com GIFT CERTIFICATE will be awarded in the FIRST-TIME PARTICIPANTS CATEGORY

Enter our 31st Annual Creatin' Contest!
The **MidTown Kit** is the starting point.

Grand Prize is a \$1,000 miniatures.com gift certificate. Three runner-up gift certificates are awarded (\$500, \$350, \$250), plus up to \$1,000 in gift certificates divided among the top first-time entrants. All entrants receive a "thank you" gift.

Deadline for entry is Friday, December 6, 2024.
Winners will be announced by mid-February 2025.

The 31st Annual Creatin' Contest **MidTown Kit**

Assembled, unfinished #42024

Contest Rules:

1. Start with #42024, MidTown Kit
2. Build the kit using products found in our catalog and at miniatures.com (or other resources when needed). You may add to, modify, landscape or use any method you choose to create your finished project.
3. Photograph your entry (see tips at right) and submit **no more than 4** high-quality, 4" x 6" photos that give an overall view of your project. **No multiple-view photos, please.** They will be excluded. Photos will not be returned. Do not use Polaroids or low-res digital printouts as they do not reproduce well. Be sure your photos are in focus! Entries will not be accepted unless accompanied by photos.
4. Enter online at miniatures.com or mail your photos and the completed entry form (below). **Deadline is Friday, December 6, 2024** for online receipt or postmark. Entries not submitted at miniatures.com should be sent to:

miniatures.com
Attn: Creatin' Contest Entries
2388 Pleasantdale Road
Atlanta, GA 30340
5. Entries will be judged on originality, creativity and quality of workmanship. "Thank you" gifts will be sent to all entrants (one gift per customer).
6. All entries become property of the contest sponsor.

Photography Tips:

1. Do not use the flash on your camera. Instead, use full daylight or electric light sources aimed onto your project from two directions to eliminate most hard shadows. If the hard light is still causing shadows, aim the lights away from the project onto white sheets of foamcore or mat board; the reflected light will be much softer and more diffused. Outdoors, white boards can be used to reflect the sunlight up and onto your project in the same way.
2. Clamp-on utility lights with aluminum shades are inexpensive, good light sources, and are readily available at hardware/home improvement stores. Use at least 1600 lumens bulbs (100 watt equivalent). These portable lights can be clamped and positioned to provide good light for photos.
3. Remember, your photos are the only way we have to judge your project. All the time, effort and talent you put into your project will be wasted—in the eyes of the judges—by blurry, out-of-focus photos. Also, take care to frame your whole project in the viewfinder without cropping off a corner or the top, and try to avoid having distracting items in the background.
