

Wicker Shelf Bins Printie

Print this page on good quality thin paper at the highest resolution on your printer.

To make two wicker basket/bins:

Print this sheet on ordinary printer paper. Cut out the two rectangles and glue them together, back to back, with glue stick. When completely dry, cut just inside the heavy black outlines and on the interior lines. Fold the sides, front and back. Glue the front flaps inside the basket and the back flaps outside.
