

#41081 Sliding Barn Door

Available exclusively at miniatures.com

Step-by-step assembly instructions

Copyright miniatures.com 2023

PARTS:

Barn Door
Track
Wheels (2)
Plates (2)
Pegs (4)

GENERAL INSTRUCTIONS

- Identify and inspect all parts.
- Read the directions completely before beginning the project.
- If possible, have a dedicated work area so that you are not unpacking, repacking, and moving the project from place to place.
- Choose a work surface that is level, clean, dry and protected from spills.
- Do a dry fit, using masking tape to hold parts in place, to make sure everything fits together correctly before assembling permanently.

Assembly Instructions

1. Paint, stain or otherwise finish the parts before assembly. Take care to not plug the holes or excessively coat the pegs.
2. Glue the **Pegs** into the holes on the **Plates** pushing them all the way through. Let the glue set for a few minutes.
3. Place the **Barn Door** flat on the work surface with the holes facing up. This is the front of the door.
4. Glue a **Plate** to the door. Align the plate so that a **Peg** aligns with a hole in the door while the other rises above the door. Assure the **Plate** is straight. Use a small amount of glue only where the two pieces come in contact.
5. Repeat Step 4.
6. Let dry.
7. Turn the door over.
8. Glue the **Wheels** to the very tips of the **Pegs**.
9. Check spacing by gently hooking the **Wheels** into the **Track**. The edge of the **Track** fits between the **Wheels** and **Plates**. The door hangs from the two **pegs** in the space left between the **Wheels** and **Plates**.
10. Let dry.
11. Glue the **Track** to the **Upstairs Wall**, above the door opening and on the side that is facing the **Ladder**.
12. Hang the assembled door. It will slide from side to side.
